**DETAILED ACTION*****Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/12/2006 has been entered.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 14 and 19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 8 of (U.S. Patent 6,564,130). Although the conflict claims are not identical in terms of wording and terminology, their scopes as a whole are substantially the same and they are not patentably distinct from each other. Claims 1 – 8 of the reference Patent (US 6,564,130) is directed to a steering assist/aiding apparatus used to assist/aid driver of the vehicle for traveling (parking) in reverse, which includes monitor display and camera, and with

Art Unit: 2621

consideration of the steering angle and control unit and a vehicle width guide lines for backward/reverse parking purpose/assistance, which are the same as the present application and the difference consider obvious over the reference Patent (US 6,611,744). It is noted that allowing claims 1 - 21 of the instant application would result in an unjustified or improper timewise extension of the "right to exclude" granted by a patent. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Feb. Cir. 1993).
